Biyash Shrestha

Full Stack developer

• 9745654746   [Portfolio]   • bsstha21@gmail.com

A dedicated and detail-oriented frontend developer with hands-on experience in building dynamic, user-friendly web applications using Next.js, React.js, and modern development tools. Skilled in creating responsive designs, integrating APIs, and optimizing performance for seamless user experiences. Passionate about learning new technologies and contributing to collaborative projects

EXPERIENCE

Freelance Frontend Developer — Sana Kisan Laghubitta Bittiya Sanstha   Jun, 2025 - July, 2025
(Internal Government Project)

- Built the frontend for an internal procurement management system using React.js and Tailwind CSS.
- Developed dynamic UI forms for modules such as Requisition Form, Vendor Enlistment, and Quotation List, incorporating role-based access control.
- Implemented API integration for form submission, retrieval, and updates, while ensuring a clean, user-friendly design.

Frontend intern (Peak Voyage)   Aug, 2024 - Nov, 2024

- Developed web applications using Next.js with responsive UI and performance optimization.
- Gained experience in state management, API integration, and deployment via Vercel, while collaborating with the team to deliver user-friendly, dynamic features.
- Collaborated with the team to deliver user-friendly, dynamic features.

EDUCATION

Bachelor of engineering in information technology   Jul, 2022 - Present
Cosmos college of management and technology, lalitpur

PROJECTS

Online food ordering: [live demo]

- Developed a robust, full-stack online food ordering system for restaurants using Vue.js for a high-performance, responsive frontend with Pinia for state management and Express.js for a scalable, secure backend, and MongoDB for efficient data storage
- An interactive admin dashboard delivering real-time analytics on income, profit, and sales and features of dynamic ordering, role-based access control and responsive design for seamless usability across device

Expense tracker application: [live demo]

- developed a real-time expense tracker application using react.js, express.js and mongodb for database enabling users to log transaction details and monitor their finances digitally.
- Integrated dynamic doughnut-chart visualization to effectively represent spending patterns and provide actionable insights enhancing user experiences and financial tracking.

Real time chat app : [live demo]

- created a real-time web-based chat application using next.js as frontend and express.js as backend and mongo as database and socket to power live messaging
- leveraged socket.io to deliver instantaneous, interactive communication with efficient connection management ensuring seamless chat experience.
